

## SUNOCO 2T Competition

**Description** Synthetic ester based self-mixing two stroke engine oil, for water and air-cooled two stroke engines.

**Application** For a wide range of two stroke engines: premixed (standard ratio 1:50 or according OEM prescriptions) or in separate lubricant reservoir.

**Specifications**

- JASO FC
- API TC
- ISO-L-EGD

**Properties**

- Self mixing.
- Higher and constant engine performance due to excellent port cleanliness, substantially reduced ring belt groove deposits and varnish build-up.
- Complete mixture combustion results in superior power output.
- No sparking fouling, nor engine pre-ignition.
- Excellent bearing and cylinder lubrication.
- Minimum smoke and odour formation.
- Very good rust protection of the engine during long periods of storage.

### Typical analysis :

Density at 15°C	0.870
Viscosity at 40°C / cSt	55.0
Viscosity at 100°C / cSt	9.0
Flash point °C	102
Pour point °C	< -40
TBN mg KOH/g	2.0
Sulphated ash / %	0.1
Colour	2.5
