

SUNOCO 2T MX Sport

Description Self-mixing partly synthetic 2 stroke engine oil, reinforced with the latest additive technologies.
Usable under varying conditions and continuously high speeds, as they occur during racing.

Application In virtually all two stroke motorcycles.
Specifically designed for use in the high speed and more powerful two strokes of the make APRILIA, HONDA, SUZUKI, YAMAHA and others, with or without oil injection.
Recommended application ratio, 1 parts of lubricant with 50 parts of gasoline (consult the prescription of the OEM to know the exact application ratio).

Specifications - JASO FC
- classified CEC TSC-3 & 4

Properties - Maximum protection against wear and corrosion.
- Prevents clogging of the sparkplugs.
- Perfect lubrication at all possible working temperatures and conditions.
- Excellent self-mixing properties in all kinds of gasoline.
- Enhanced low smoke engine emission properties.

Typical analysis :

Density at 15°C	0.863
Viscosity at 40°C / cSt	65
Viscosity at 100°C / cSt	10
Flash point °C	100
Pour point °C	-21
TBN mg KOH/g	1.6
Colour	L3.0
