

Product information

SUNOCO

2T Scoot

Description Self mixing two-stroke oil for use in high performance two cycle engines of scooters.

Application In two cycle scooters, typical application rate being one part of lubricant for 50 parts of gasoline. Also suitable for two stroke engines with injection system. Can also be used in high speed and more powerful two strokers.

Specifications

- API TC
- CEC TSC-3

Properties

- Self mixing.
- Prevents bearing corrosion, coking and pollution of the sparking-plug.
- Excellent self-mixing properties in both lead and lead-free gasoline.
- Maximum protection against wear and corrosion.

Typical analysis :

density at 15°C	0.893
viscosity at 100°C / cSt	8.5
flash point °C	125
pour point °C	-18
