

## SUNOCO 2T Kart

**Description** Self mixing two stroke motor oil based on synthetic esters. Developed to come up to the needs required in Kart races. 2T Kart is suited to be used under fast changing conditions as well as under continuously speed and load conditions.

**Application** To be used in all types of Kart engines. Application rate is typically one part up to two parts of oil for 50 parts of gasoline or as prescribed by the manufacturer.

**Specifications**

- Meets the 'JASO FC'-specifications
- ISO GD

**Properties**

- reduces the engines internal friction more than other oils.
- prevents coking and pollution of the sparking-plug.
- excellent self-mixing properties in both lead and lead-free gasoline.
- excellent low smoke and low ash properties.
- maximum protection against wear and corrosion.

### Typical analysis :

Density at 15°C	0.870
Viscosity at 40°C / cSt	55
Viscosity at 100°C / cSt	9.5
Flash point °C	110
Pour point °C	-45
TBN mg KOH/g	2.5
