

Product information

SUNOCO

Gearol B2

The ideal gear compound for all open gears of various types through high pressure lubrication in the smallest corners. Also for cables and steel wire. Protects against wear and corrosion. Water resistant.

GEAROL B2 is an outstanding solvent cut-back, soft film compound containing a volatile agent.

This product is applied by mere spraying, made possible by removing the protecting capsule and pushing the spray button.

It is used primarily for the lubrication of open gears, draglines of cranes, excavators and earth-moving machines, steel wires of elevators and other slow moving heavy chains and cables. In general, for all applications where a gear spray lubrication is required.

Typical analysis :

Density at 15°C	0.636
Vapour pressure / bar	3
Colour	brown/black
Odour	oil
Propulsion gas	propane/butane
