

Product information

SUNOCO

Nitro+ 70

Description Nitro+ 70 is specifically designed for racing vehicles fueled with nitromethane or methanol. It contains antiwear and extreme pressure additives to help protect the engine in extremely hostile applications.

Application In the super charged engines for Top Fuel Dragsters, Top Fuel Funny Cars and other demanding applications of this type, where the engine is subjected to high cylinder pressure and extreme bearing loads created by nitromethane and methanol fuels.

Properties

- Exceptional dispersancy, helps to withstand the high levels of fuel dilution that will occur.
- Superior antiwear and extreme pressure additivation.

Typical analysis :

| | |
|--------------------------|-------|
| Density at 15°C | 0.908 |
| Viscosity at 40°C / cSt | 373.1 |
| Viscosity at 100°C / cSt | 28.9 |
| Viscosity index | 107 |
| Flash point °C | 250 |
