

SUNOCO

Stern Tube Lubricant

Description Stern Tube Lubricant is a premium quality naphthenic type mineral oil with so called "fatty" lubes of non mineral origin and a paraffinic type additive with high molecular weight.

Application Stern Tubes Lubricant is an excellent heavily bodied lubricant for many ship stern tubes as well as for a number of other lubrication applications for which a lubricant of this viscosity is being prescribed and water contamination is not to be avoided.

Properties

- Good oxidation stability
- Suitable emulsifying properties with water
- Excellent adhesion to the surfaces to be lubricated
- Maintains adequate lubricating and sealing film
- Guarantee for low friction during boundary lubrication conditions
- Effective protection against rust

Typical Analysis :

Density at 15°C	0.930
Viscosity at 40°C / cSt	245
Viscosity at 100°C / cSt	15.0
Flash point °C	225
Pour point °C	-15
