

Product information

SUNOCO

Energy Racing 20W50

Description Top quality, high viscosity racing fluid, reducing friction and giving perfect lubrication at the highest rpm's.
Especially designed to resist breakdown from contamination by racing fuels.

Application This high performance lubricant is formulated to lower operating temperatures and provide maximum protection for engines working under heavy duty or high performance conditions.
It extends bearing life in high rpm / high horsepower drag race engines.
Special Racing 20W50 can also be used in stock car engines,... in short it can be used in virtually all racing engines requiring a 20W50 oil.

Specifications - API SJ / CD

Properties

- Thanks to its high viscosity a "wet" start assured, even after longer periods of non-use.
- Protection against rust and corrosion.
- Neutralizes combustion acids.
- High level of detergency and dispersion to resist sludge and varnish formation.
- Thanks to the special anti-wear additives an oil film is formed protecting the engine against scuffing and wear.

Attention Despite its superior quality we advise to change oil after every race.

Typical Analysis :

Density at 15°C	0.886
Viscosity at 40°C / cSt	198
Viscosity at 100°C / cSt	21.3
Viscosity at -15°C / cP	9500
Flash point °C	230
TBN mg KOH/g	7.2
