SUNOCO

Sunfood Chain Spray

Description Very good sticky food grade chain lubricant in spray can.

Application For the lubrication of chains, slide and chain ways, bearings, hinges,... for which a food grade lubricant is required. Also applicable in textile, paper and graphical industries, packaging, plastic, tobacco and elevator industries. On top of this chain spray gives excellent results when used on motor chains and transmission boxes of karts.

Specifications - NSF H1 Category registered. NSF registration number 140922.

Properties

- The spray is based on synthetic oil and contains 4% PTFE.
- Offers a perfect protection against corrosion, oxidation, friction and wear.
- Very good water resistant.
- Applicable at high temperatures.
- Rejects dust and dirt on the chain.
- Prevents blocking and extends the life of the chain.
- Provides a very clean lubrication.
