

SUNOCO Sunfood HT Grease

Description Inorganic grease with a silicone oil basis appropriated for the static lubrication at high temperature and in hard working conditions.

Application Bathroom plumbing lubrication, valves, expansion valves exposed to high or low temperatures.
O-rings, doughnut rings assembly,... Conveyor chains in the food-processing industry. Cable drafts, electric line, water pumps.

Specifications - NSF H1 Category registered.

Properties

- Insoluble in water, hot water, steam or nautical atmospheres.
- Odourless.
- Excellent thermal resistance.
- Insulating grease.
- Very good protection against oxidation, corrosion and calcareous.

Typical analyses :

NSF Registration	
NLGI	2
Nature of soap	Inorganic
Nature of base oil	Silicone
Penetration :	
- non-worked	220 – 250
- 60 strokes	>230
Dropping point	None
Temperature range °C	-50 / 220
Density at 25°C	0.970
Base oil viscosity cSt	1000
